

# Micro Device Fabrication & Materials Analysis Workshop

March 06 - 07, 2020

The **Advanced Materials Engineering Research Institute (AMERI)** invites you to attend a two day training workshop on micro/nano device fabrication, materials analytical techniques, and failure analysis.

## Topics

- SEM/Optical Imaging & failure analysis.
- Micro/Nano device technology & process techniques.
- ISO 5&7 cleanroom experience.
- Additive Manufacturing/3D Printing.
- Remote access & usage of AMERI facilities.
- Course includes hands on experience in labs & tour of major FIU research facilities.
- Material properties at multiple scales.
- Electronic packaging.

## Registration

• **Maximum Capacity 25** •

For more info please contact: Giselle Alvarez
